

Duck Pond Assembly/Safety Rules

Assembly -

1. Select a level area to operate game with plenty of room to allow for a line to form. Keep a safe distance between player and the electrical cord and power source.
2. Place the steel base on a firm, level area.
3. Place the tub on top of the base.
4. Attach the skirting to the tub.
5. Insert the sign posts on either side of the tub, and slip the sign board in place.
6. Put a rubber duck onto the tops of both posts.
7. When taking down the game, do not fold skirting wet. Always dry thoroughly first.
8. If storing outside, leave the tub upside-down, so that rainwater does not collect inside.

Safety -

1. Before each use, inspect the power cord for any nicks or bad places in the insulation.
2. As always, use extreme caution when using electrical items near water.
3. The pump is supplied with a grounding conductor. To reduce the risk of electrical shock, be certain that it is connected to a properly grounded grounding type receptacle. **DO NOT REMOVE THE THIRD PRONG FROM THE PLUG.**
4. Do not use an extension cord.
5. Be sure that the power cords run behind the unit and do not pose a trip-hazard.
6. Be sure to continually mop up any water that is splashed onto the floor, to avoid any slip hazard.
7. Do not pull the pump out of the water by its cord when the pump is operating or connected to the power source.
8. **NEVER USE THE GAME IN STRONG WINDS OR LIGHTENING!!**
9. **NEVER LEAVE THE TUB UNATTENDED WITH ANY AMOUNT OF WATER IN IT.**
